- Problem Solving, OOP. (Flexibility).
- Software Development (Hard Working).

Personal Skills:

- Leadership.

My Projects :

- **Dynamic Todo App:**

Users can add, edit, delete, and prioritize tasks. Each task typically contains a title, description, due date, and status. The app allows users to reorder tasks by dragging and dropping them into different categories or positions, making it easy to organize and prioritize tasks.

- Using the Below Features
 - Angular
 - Angular-material
 - Java script

- **Recipe Book:**

Users can add new recipes to their collection and categorize them based on different types of cuisines or meal types. Each recipe includes a comprehensive list of ingredients required for the dish, making it convenient for users to shop for the necessary items.

- Using the Below Features
 - Angular
 - Angular-material
 - firebase
